Projects

X-BOOX Mobile App
Software Developer, Database Administrator, JAN 2021

XBOOX is a charity app for anyone who have unused any type of books to share with people. A great application for book lovers exchange books with another user to share knowledge. This mobile application was built using JAVA, Android Studio, Firebase Realtime Database, and Cloud Firestore.

Italian Cuisine Database System
Software Developer, Database Administrator, JAN 2021

A database system for Italian Restaurant to create, read, update and delete products, customers details, and staffs information. Users can also add a new order for customer and generate invoices based on details of the customer and order made at the order section. This database system was made using Visual Studio, SQL and Microsoft Access.

Italian Cuisine Website
Software Designer, Software Developer, JAN 2022

Web-based system for restaurant management. Users can create, read, update and delete products, customers, and staffs information through Italian Cuisine Website based on database built in Italian Cuisine Database System. This website was built using HTML, CSS, JavaScript, PHP, Bootstrap and mySQL.

Eventastic Mobile Application & Admin Website
Requirement Analyst, Software Designer, Software Developer, Software Tester, JAN 2021 - FEB 2022

Eventastic application is an android application which has the capabilities of to suggest the user to insert important details about their event by segment and display all needed calculation and details by dashboard. This application used Google Map API with integration of MYSQL database to save data of the user. There is also a web-based admin system connected to this app for the admin to add/remove venues from the app. Developed over 40 test plan and test cases and drafted testing report for this project. This was made using JAVA, Android Studio, MYSQL, PHP, HTML, CSS, and Javascript .

Myst al-Hakim
Requirement Analyst, Software Designer, Software Developer, Software Tester, NOV 2021 - Present

Myst al-Hakim is 3D multimedia desktop games that apply exploration approach for kids to complete the score by reaching every checkpoint and take the quiz at the end. This project fulfill the requirements of syllabus from "Tadika Alim Soleh" to improve teaching approach for kindergarten kids. This games developed using Unity, Autodesk 3DS MAX and C# language.

Activities

Design Thinking Program
Helping out on the setting up the session between UKM students and contestants for the program. During the session has been involved as facilitator for the session energetically so it could run smoothly during session . While during the program, has been managed on participants and panels during the session.

Program Bisnes Kebal Pandemik
During the 3rd wave of Covid-19 case spike, Special Interest Group i-Bisnes FTSM UKM has initiated an workshop to help community in Malaysia to start building a strong financial state. There are critical conflict that happen which is communication between club at the time as all handled virtually and several information could not be delivered clearly. I have assisted in managing teams and approach for social media marketing strategy.

SUKEM (Sukan Universiti)
Table Tennis Silver Medallist in University Sport Championship 2019 for Kolej Pendeta Zaaba, UKM. This competition was open to all colleges in UKM.
